Pipework Application - Personnel Protection & Energy Retention

A bulk storage facility shown here utilised Deltacoat's (Mascoat) Industrial Insulation Coatings to produce a reduction in heat transfer for their pipework. As shown in the pictures below. The temperature was reduced from 68-75 degrees Celsius to a safer 29 degrees Celsius.

Initial Reading prior to coating of Industrial Insulation Coating reading 75.2°C and 68.1°C on picture to the right.

Shows reduction to 29°C after application of industrial insulation coating
